Art Unit: 1796

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on January 28, 2008 has been entered.

2. The terminal disclaimer filed on January 28, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 7,141,647 has been reviewed and is accepted. The terminal disclaimer has been recorded.

3. Claims 15, 17, 18, and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Within claims 15 and 18, the language, "said urethane resin" and "said decomposition agent", lack antecedent basis.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 15, 17, 18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19512778 C1.

The reference discloses the production of isocyanate-reactive polyol dispersions, that may be reacted with polyisocyanates to produce polyurethanes, wherein the polyol dispersions

Art Unit: 1796

are produced by decomposing waste polyurethane with cyclic anhydrides, such as phthalic anhydride or succinic anhydride. See abstract and claim 12 of translation. Furthermore, the reference allows for the use of extruders. See third page of translation, third line from the bottom of the page.
